Oil, Water, and Gas Cause Excitement at Fabyan Well

Irma Oil Field Most Important Territory in Canada Today.

Heavy Pressure of Gas Breaks Through Just Before Completion of the Well

Great excitement was caused in the Irma and Wainwright districts last Thursday when the report was spread that oil and gas was spouting over the top of the derrick at the Imperial Oil Company's well ten miles east of Irma. What really happened will probably never be known as far as the general public is concerned, as the attitude of the Imperial Oil Company is not to give out any information that might have a tendency to boost the district. In fact in both Tuesday's and Wednesday's Edmonton Journal, reports from the production manager of the Company were published that nothing unusual had happened at the Irma well.

These reports are not considered serious by those who had seen the well during the last few days. Early Tuesday forenoon some parties brought the report to Irma that the cap had been blown off the well, and that oil was being blown thirty feet over the top of the derrick. Immediately cars were started from all parts of the district to the scene of the excitement. As far as the derrick could be seen, a heavy cloud of black vapor could be seen floating from its top. As the cars approached the well the deafening roar of the escaping gas (estimated at from twenty to thirty million feet a day) soon convinced the spectators that something out of the ordinary was happening. Samples of the black fluid were obtained by some of the residents of Wainwright and Irma. This has been pronounced by a geologist as being the same grade of oil as is found when first approaching the oil sands in many of the California oil fields. Unfortunately, the editor of the Times was in Edmonton Tuesday and Wednesday and missed the excitement caused by the good news. Thursday accompanied by some residents of Irma we visited the site of the new discovery. Little information was obtainable. The gas pressure was evidently subsiding, but enough gas was escaping to be distinctly heard before the car reached the well site. A light mist was being forced nearly to the top of the derrick. Men were seen working around the derrick, clothed in gum boots and slickers, apparently they were cleaning the slimy oil from the machinery and timbers. Outside of the oil-stained boards of the derrick little evidence of oil could be observed.

Mr. Allison, the head driller appeared very pessimistic as regards the development of the last few days. He even intimated that he would not be surprised if he received instructions to discontinue operations. However, his remarks were not taken seriously.

Mr. J. O. Williams, Geologist of Calgary, has been spending considerable time in the Irma and Wainwright district and was interviewed by the Times, Thursday afternoon. Mr. Williams has tested a sample of the oil he received from some Wainwright parties, this sample tested 13 beaums. He claims this oil after the cap rock had been pierced and the real body of oil released should test from 30 to 35 beaums. Mr. Williams considers the Irma and Wainwright fields an exact replica of the famous California Oil fields. He also stated that in his opinion, had the drill been run a few more hours longer a gusher of from five to ten thousand barrels a day would have been brought in. His opinion is that it is the gas from a higher level that has broken through and caused the recent upheaval of oil and water. Mr. Williams has just spotted a drilling site for the Wainwright Oil and Development Co. on L. S. 15 Section 36-44-7 and predicts that within the next few weeks we will see scouts for several of the large American Oil companies looking for drilling locations in what should soon be Canada's greatest oil field.

BIG RUSH FOR IRMA LEASES

Last Monday night some twenty men stood in line at the Edmonton Land Office in order to be in line for filing on oil leases in the Irma district. According to the Edmonton papers leasing has been active all week. Some 8,000 acres of government land has been leased, some over twelve miles from the Imperial Oil Co's well. Although there has been considerable activity in leasing oil lands, no sales are reported. One oil man says he has offered some holdings within a few miles of the Fabyan well at \$5.00 per acre but buyers are not to be found. Since the first oil excitement in the Irma district some five hundred leases have been filed on. No doubt some of the holders of these leases will have a chance to have them developed within the next few years, but the majority of the holders will probably have to wait a few years yet before they are able to raise enough money, or find the parties who are willing to have them developed. However, several groups have been formed which will facilitate holding the leases through drilling done on one of the leases in the group. Under the new regulations up to 2,000 acres can be grouped under one drill. By turning leases in a group that drilling is assured on, under the royalty basis the owner will eventually be assured of a share of the oil under his land. Until more rigs are drilling it is not likely that there will be a rush to buy leases. In Montana and the fields south of Canada most of the leases are drilled on a royalty basis. In this way the owners of the leases are enabled to receive a good income without putting up the necessary capital to do the drilling.

FABYAN BOOMING

The oil strike near Fabyan is showing its effect in the sale of town lots in the new township. Mr. Geo. Madde has had a sub-division surveyed in his half section west of the station. Up till Thursday he has sold ten lots and has had an offer of \$75.00 per acre for the balance of his farm. Two houses are being erected, the framework is up for a blacksmith shop. A restaurant, Livery Barn, Machine & Implement business, Pool Room and Lumber yard are among the businesses that have been securing locations.

HURT NEAR OIL WELL

Last Thursday while Mr. and Mrs. J. G. Clark accompanied by Mrs. W. B. Steele were driving on the Battle River hill near the oil well, the team became frightened at the roar of the escaping gas and started backing down the hill. Mr. Clark succeeded in getting the infuriated horses by the bridles but was unable to control them. The rig was backed down the hill and upset, pinning Mrs. Steele under the box. Fortunately she escaped with a few bruises. Considerable damage was done to the democrat and harness.

TESTING GAS FROM GRATTAN WELL

Thursday a party of experts supposed to be employed by the National Gas Co. were at Irma testing the gas from the old Grattan well. It is presumed this test is being made to find out the advisability of using the gas in an absorption plant for the recovery of gasoline. No results from the tests have been ascertained locally.

The Ladies Aid will meet with Mrs. P. W. Higginson on June 14th, at 3 o'clock.

HOLDING & ROYALTY COMPANY ACTIVE IN PROMOTING DEVELOPMENT.

The well of the Holding & Royalty Company on the Campbell permit, where the Company holds acreage in sections 20 and 21, township 35 north, range 3 west, has been spotted on the southeast quarter of the north-east quarter, according to an announcement made by J. H. Hamilton of the Company.

The location was spotted by Charles J. Stone, geologist for the Holding & Royalty, and Gordon Campbell of the Gordon Campbell-Kevin syndicate, and is a little more than a mile from the Campbell well.

A. E. Crumley, in charge of drilling operations for the Holding & Royalty left Monday for Moore where he will superintend the dismantling and loading of a rig to be transported to Kevin for the new work. Rig timbers have been ordered from Kevin and preparations are being made for immediate drilling. Mr. Crumley has had experience in drilling in Pennsylvania and other eastern states as well as in mid-continent and southern fields. He has also had experience in drilling in Montana.

The Holding & Royalty Company, it will thus be seen, is playing an important part in Montana Oil Development.

Main Street

Mr. Geo. Tripp is sporting a new car.

Mr. Ray Moore was a visitor to Edmonton this week.

Mr. B. W. Macdonald, of the Well, has charge of the U. G. G. Co. elevator.

Mr. F. Peterson returned Thursday night after spending a few days in Edmonton.

Mr. Steve Jones of Viking was in Irma Thursday with some oil men who motored through from Viking.

Born to Mr. and Mrs. Ted Bareth on Thursday, June 1st, a son.

Born to Mr. and Mrs. Carl Sonof, at Mrs. Curfman's Hospital, on June 3rd a son.

Mr. J. R. Love, M.L.A. has been attending the Farm Boys-convention at the University of Alberta this week.

Rev. G. & Mrs. Elliott returned to Irma Wednesday evening after attending the Methodist conference at Edmonton.

Mrs. J. C. McKay and her son Donald are expected home Saturday night.

The Irma baseball team journeyed to Wainwright last Friday night for a game with the Greenhills nine, we believe the score was 8-5 in favor of Greenhills.

Mr. Chas. Latimer has installed a new acetylene torch for repairing radiators and scored cylinders. This will be of great importance to owners of leaky radiators.

Mr. A. Turnbull returned to Irma from Edmonton Wednesday evening.

The W. M. S. will meet with Mrs. E. W. Carter on Thursday, June 15th.

All Ladies are invited to these meetings.

According to a report from Hardisty in Thursday's Journal, two miles in the Battle river bottom in the Lewisville district has become a breeding place for grasshoppers. The municipalities of Lewisville, Silver Lane, and Full View have united to fight the plague. Over a hundred loads of straw are reported to have been burned on the breeding grounds while waiting for poison from the government.

LEWISVILLE

The cause of trouble has been removed—the big bunch of cattle grazing on park land has departed.

Miss Johnson, and each of the other Championship Basketball girls received a beautiful gold medal, suitably engraved and suspended from a fine gold neck-chain, a handsome trophy.

A big dance in the Blacksmith's new building at Fabyan on June 7th. Emil Skogg is giving a dance at the Lewisville school on Friday night, June 8th.

Enoch Alm, of Wetaskiwin has been visiting his brother, Henry, lately. The school inspector, Mr. Fuller, visited the school this week.

Quality Merchandise ::

LADIES' UNDERWEAR

A Vest for girls that is a really exceptional value. All sizes in a very heavy fine Cotton that have a nice appearance and will give splendid service.

ALL SIZES 40c - 50c

Girls Vests in light weight Cotton. All Sizes 20c - 30c
Womans Vest in all kinds, and all sizes, from the ordinary vest to the very nicest kind in Opera style. 35c - \$1.25
Womans Combinations in a large range of goods, Comfy Cut and Short Sleeve. We can show you a very nice range of them indeed. 75c - \$1.25

Ginghams

You will need something right along now for House and Afternoon Dresses and Childrens Wear. We have a lot of nice new things in that will interest you, in Ginghams, Crepes, Voile, and Muslins, and the price is very reasonable. Just let us show you what we can do for you in these things.

Boys' Running Shoes

We have a new line for which we are the exclusive agents. They come in a heavy all red rubber Sole and Heel, heavy rubber toe cap, with a re-inforced-plate on the ball of the foot. For economy, comfort and class they are in a class all alone. See them first.

Groceries of high quality at close prices.

1 Gal. Plums \$1.00
1 Gal. Peaches \$1.35
1 Gal Sweet Pickle \$1.65

Freight Rates And Business

A special committee of the House of Commons has been appointed to study the whole question of freight rates with a view to bringing about a reduction in the existing high schedule, which it is generally agreed, is having a detrimental effect on business, is operating to prevent a revival in industrial activity, and is particularly paralyzing Western agriculture.

The problem of reducing rates in the face of an annual deficit of many millions of dollars in the operation of the National Railways is admittedly a difficult one. The National Railways badly need every dollar of revenue they can get, and a substantial reduction in freight charges may prove a very serious matter for them. Yet anything less than a substantial cut will be quite ineffective in providing a much needed stimulus to business and an appreciable aid to the farmers of the country.

There is, however, much force in the argument that a lowering in the carrying charges of the railways will not necessarily mean a reduction in net revenue earned. On the contrary, it is well within the realm of probability that the result would be an increase in revenue. Present rates are perilously close to the line where they amount to actual prohibition of traffic, and if a reduction of rates has the effect of stimulating business and thereby increasing traffic the railways may easily record increases rather than the much feared decreases.

Support for this view is found in a comparative study of the figures of revenue and expenditure of Canadian railways for the years 1920 and 1921. Freight rates were increased in September, 1920, and partly reduced in January, 1921, and in December, 1921. If the arguments of those opposed to rate reductions is good, then the deficits in operation of the railways should have been greater in 1921 than in 1920. Yet the reverse was the case. The deficit on the old Canadian Northern system was nearly \$10,000,000 less in 1921 than in the previous year; the deficit on what are known as the Canadian Government Railways, chiefly the Intercolonial, was almost cut in two, being reduced by \$5,000,000; the Grand Trunk Pacific, which showed a loss of \$10,000,000 in 1920, dropped to just under \$1,000,000 for 1921.

These three roads between them showed a deficit in operation for 1921 of something over \$16,000,000 where in 1920 the total was over \$37,000,000. The operating profit of the old Grand Trunk was increased and so, too, was that of the Canadian Pacific.

Of course, there may have been, and undoubtedly were, other factors contributing to the betterments shown. Nevertheless, the figures would seem to point to the conclusion that rate reductions were not in themselves disastrous, but that, on the contrary, they proved beneficial and were contributing factors in bringing about a marked improvement in railway finances.

Admitting, however, for the sake of argument that substantial rate reductions will result in an increase in the operating deficit of the Canadian National Railways, the question arises whether it would not be better to face that possibility and meet the loss out of general taxation for a year or two, if through such reduction in rates, there was marked encouragement given to agriculture, manufacturing and business generally throughout the Dominion, with a consequent lessening in unemployment and increased buying power by the people and some return of prosperity.

The present deficit on the Canadian National Railways is, it is almost more than can be borne, because, through lack of employment and general business depression, they have without money and in the absence of means of earning money. But with a return of business activity and more employment the people would be able to more easily pay even somewhat heavier taxes, if necessary, to meet a slightly larger railway deficit.

The railways are one of the chief agencies in the upbuilding of trade and commerce, and if their rates are maintained at a level so high as to restrict traffic, they are not benefiting either themselves or the people and country they were created to serve, but are, as a matter of fact, killing the goose that lays the golden eggs.

The experiment of enforcing a substantial reduction in freight rates as a means of reviving business throughout Canada, and giving some much needed encouragement to agricultural production, may well be tried at this time.

Farmer Premiers

Five of the Provincial Premiers Are Farmers by Occupation

When the Premier of Manitoba makes the point that he is a farmer, he calls attention to the fact that farmer premiers are quite common in Canada. Leaders of the Ontario and Alberta Governments are farmers both politically and by occupation. The Premier of Manitoba and British Columbia are Liberals in politics and farmers by occupation. The Premier of Saskatchewan is a farmer in politics and is down in the Parliamentary Guide as a farmer by occupation. This accounts for five of the nine provincial premiers. Three of the others are lawyers, and the fourth a merchant—Vancouver Province.

Japan Buying Lumber

Japanese Government Bans Production of Lumber from Native Forests

According to Mr. J. Sato, of Kobe, who arrived in Victoria with a party of Japanese lumber and pulpwood buyers, said to represent \$35,000,000, Japan is to make an unprecedented demand for Vancouver Island lumber this year. The principal reason for this heavy foreign buying is that Japan has banned the production of lumber from native forests and pulpwood for almost every type of lumber have for some time been pouring into the Vancouver Island market.

Corns Between the Toes, Painlessly Removed

A real, sure, dependable remedy that has been living out corns for the past fifty years will surely lift yours out. Putnam's Corn Extractor is the old reliable corn remedy—it stands the test of time and never fails, 25c everywhere.

Recalls Days of Nelson

Mary Ann Carr, born on Nelson's ship, is Dead at Age of 85. Mary Ann Carr, who was born in the cockpit of Nelson's ship, Victory, near the spot where the famous admiral fell, has just died at Portmouth at the age of 85. Her memory of the early days aboard the ship was fresh up to within a few days of her death. She once saw a sailor flogged. The picture of the man suffering remained vivid in her mind through her long life. Only once did she see such a sight for on other occasions she was sent ashore to be spared the spectacle.

Just as there is a potential state in every block of marble, so is there an ideal self in every man. Be, then, the sculptor of your own character.

Keep Minard's Liniment in the house

Overcrowded Britain

An eminent statesman reminded me the other day that in spite of the war the population of Britain has increased by 2,000,000 during the last decade. He asked me whether I thought the country could support them all, and I replied in the negative, suggesting that emigration is the only remedy. The trouble is that our surplus is among townspeople and not the rural workers needed by new countries.—London Sunday Pictorial.

A NERVOUS BREAKDOWN

When the Blood is Out of Order the Nerves Are Starved

The nerve system is the governing system of the whole body, controlling the heart, lungs, digestion and brain, so it is not surprising that nervous disturbances cause acute distress. The first stages of nervous debility are noted by irritability and restlessness, in which the victims seem to be oppressed by their nerves. The matter requires immediate attention, for nothing but suitable treatment will prevent a breakdown. The victim, however, need not despair, for even severe nervous disorders may be relieved by improving the condition of the blood. It is because Dr. Williams' Pink Pills purify the blood that this medicine has proved beneficial in nervous disorders. The nerves thrive on the better blood made by these pills. The appetite improves, indigestion is better, sleeplessness no longer troubles the nerve-shattered victim, and the general tone takes on a cheerful aspect. The value of these pills in cases of this kind is shown by the experience of Mrs. John W. Macdonald, Cardigan, P.E.I., who says:—"I have much cause to be grateful to Dr. Williams' Pink Pills. I was suffering from nervous breakdown, and my condition gave alarm to both my friends and myself. I suffered almost constantly from nervous headaches, my appetite was poor, I hardly got any sleep, and in every way I was badly run down. A friend advised me to try Dr. Williams' Pink Pills, and after I had taken them for a while there was a noticeable improvement in my condition. I continued using the pills until I had taken twelve boxes, when every symptom of the trouble was gone, and I have since enjoyed the best of health."

You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail for 50 cents a box or six boxes for \$2.50 from Dr. Williams' Medicine Co., Brockville, Ont.

Alberta Agricultural Production

The estimated value of agricultural and livestock products produced in Alberta in 1921 was \$317,455,706. Of this sum grains, fodders and vegetables accounted for \$25,255,000; stock products, \$150,000,000; wool, \$15,000,000; dairy products, \$25,500,000; wool, \$15,000,000; game furs, etc., \$1,500,000; poultry and poultry products, \$3,470,000; and horticultural products and garden stuff, \$1,500,000.

Worms are encouraged by morbid conditions of the stomach and bowels, and so subvert. Miller's Worm Powders will after these conditions at most immediately and will sweep the worms away. No destructive parasite can live in contact with this medicine, which is not only a worm destroyer, but a health-giving medicine most beneficial to the young constitution.

Cherries Lead in Bacteria

A scientist has succeeded in calculating the number of bacteria in certain fruits. He found 1,000,000 in half a pound of gooseberries, 8,000,000 in a half a pound of grapes, and 12,000,000 in half a pound of cherries.—Cleveland Plain Dealer.

HOW'S THIS?

HAIR'S CATARRH MEDICINE will do what no other medicine can. It cures Catarrh of the Bladder, and is recommended for any other disease of the urinary system. It is a potent, safe, and effective remedy, taken internally, and acts directly on the blood upon the mucous surfaces of the system, thus reducing the inflammation and assisting Nature in restoring normal conditions. All Druggists. Circulars free. F. J. Cheney & Co., Toronto, Ont.

Proposed Experimental Farm for B.C.

It is reported that the next experimental farm to be established in Canada will be in Northern British Columbia, an immense tract of country of wonderful agricultural richness that is attracting the attention of many United States farmers. Minerals, water power, fish, fur and forests are also among its assets.

The region about the Dead Sea is one of the hottest places on the globe, and the sea loses many tons of water a day by evaporation.

Canadian National Excursions

Plan Your Summer Trip Via the National Route

The Canadian National Railways announce their summer excursion rates to the Pacific Coast and to Eastern Canada. The Pacific Coast trip through the Canadian Rockies, includes choice of route on land and sea, going or returning. A magnificent 750 mile voyage between Prince Rupert, Vancouver, Victoria and Seattle may be taken. The trip to Eastern Canada includes all rail and lake and rail; with choice of routes. See Toronto, Quaint Quebec, the Thousand Islands, and the magnificent Niagara Falls. Sail down the St. Lawrence.

The Canadian National trains cross the Rockies at the lowest altitude, the easiest gradients, and in view of Canada's highest peaks. Break your journey and stay at Jasper Park Lodge, Lac Beauvert, Jasper, Alta. The lodge is open from June 15th to Sept. 15th. It is modern in every respect, a charming vacation, and commands a wonderful view of all the prominent mountain peaks. On your trip to the East, have your travel plans include a few days at "Minaki Inn," 115 miles east of Winnipeg. Decide now to take a holiday. You owe it to yourself and family. Get suggestions and full information as to fares, reservations, train service, etc., from any Canadian National Agent. Ask for free tourist booklets.

Nervous Breakdown COULDN'T SLEEP NIGHTS

To those on the verge of a nervous breakdown the following symptoms present themselves: nervous headache, disturbed, restless and unrefreshing sleep, a feeling of depression, listless, a feeling of being alone, horror of society, etc.

When the nerves become affected in this way the heart generally becomes affected too, and on the first signs of any weakness of the heart or nerves, flagging energy or physical breakdown, get suggestions and full information as to fares, reservations, train service, etc., from any Canadian National Agent. Ask for free tourist booklets.

This you will find in

MILBURN'S HEART AND NERVE PILLS

Mrs. M. Damgard, Young's Cove Road, N.B., writes:—"I was bothered very much with my heart and nerves, had nervous headaches and dizziness, could not sleep at night, and my appetite was all gone. I was on the verge of a nervous breakdown when a neighbor told me to try Milburn's Heart and Nerve Pills. I took four, and in a few days the second box used I was better and would advise anyone who has nerve trouble to try them."

Price, 50c a box at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Low Price of Manitoba Farm Land

That land in Manitoba is equal to that of soils in Illinois and Iowa, where the land is sold at \$100 an acre, is one of outstanding statements of Prof. Bracken, of the Agricultural College, in his report tabled in the Legislature. In the survey covering the Dominion the average price of Manitoba farm lands was returned at \$35.

Requisite on the Farm.—Every farmer and stock-raiser should keep a supply of Dr. Thomas' Electric Oil on hand, not only as a ready remedy for ailments in the family, but because it is a horse and cattle medicine of great potency. As a substitute for sweet oil for horses' hooves, it is far superior to anything that can be administered.

The Mysterious Dogs

Method Adopted by Farmer to Protect His Fruit Crop

A photograph that acts as a policeman has been rigged up by a fruit farmer in the United States in his orchard.

This is the way he worked it. He rigged up an old photograph inside an unused lecture and had a record made of the fierce barking of dogs. Then he connected the machine by an electric wire with his house, which was within sight of the road. As soon as he sees an automobile stop in the road, he turns on the switch and the raiders are frightened by the barking of dogs, though they cannot see the animals.

However, the motor thieves never wait to find out where the barking is coming from.

War Base at Suez Has Been Dismantled

Was One of Greatest Centres During World War

What was once considered the greatest military dump in the world, El Kantara, the British army base on the east side of the Suez Canal, has now almost entirely reverted to the wilderness of sand and silence whence it rose.

Its passing marks the demise of one of the most important "war baby" soldier cities.

In 1914, El Kantara was merely the name of a "place" on the Suez Canal, 45 minutes by train from Port Said. With the beginning of the Palestine campaign, the transformation began. Pioneers, engineers and army service corps detachment whipped out a town.

There were erected enclosures for cattle, horses, mules, donkeys, fodder, for great guns and small caliber carts. There appeared enclosures for prisoners and the miscellany of cantines, contractors' huts, officers' quarters and barracks that made up a great war centre.

When the armistice was signed, El Kantara's stores included quantities of every appliance of war. Its dismantling began in 1920. Contractors rushed in and secured great bargains. Gradually the vast accumulation dwindled, until recently the Disposals Board finished its work and the site was handed over to the Egyptian Labor Corps—a dilapidated, empty hulk.

Dye Skirt, Dress Or Faded Draperies In Diamond Dyes

Each package of "Diamond Dyes" contains directions so simple that any woman can dye or tint faded, shabby skirts, dresses, waists, coats, sweaters, stockings, hosiery, draperies, everything like new. Buy "Diamond Dyes"—no other kind—then perfect home dyeing is guaranteed, even if you have never dyed before. Tell your druggist whether the material you wish to dye is wool or silk, for different dyes, or mixed goods. "Diamond Dyes" never streak, spot, fade, or run.

A Vegetable Octopus

South American Plant Crushes Life From Fish and Birds

A plant found in South America—a kind of vegetable octopus—has been known to kill human beings. One specimen was found by a naturalist near Lake Titicaca. This map, at the bottom of the page, shows the location of the plant. The plant is a kind of vegetable octopus, and it is very difficult to get rid of. It is a very dangerous plant, and it is very difficult to get rid of. It is a very dangerous plant, and it is very difficult to get rid of.

Willst freeing the dog he felt "the fibers curl like sinuous living fingers about his hands," and it required all his strength to free himself from the grip of the animal. The man and dog were blistered and bloodstained by the attack of this "land octopus."

The "cannibal tree" of Australia, which resembles an enormous pile—some nine or ten feet high, with a fringe of huge, strong leaves at the top—has the reputation of being able to crush the life out of a human being—the leaves closing on him like a trap and mangle his body.

The "telegraph plant"—a native of India—has "tremendous electrical powers. Each leaf is composed of three leaflets, the largest of which stretches out to the sun during the day but hangs down at night, while the two smaller ones move in circles, round and round, in move of jerking motions.

Severe shocks have been experienced by unsuspecting people, who have investigated too closely the "perpetual motion" of the leaflets, and it is conceivable that to anyone with a weak heart—such shocks might prove fatal.

Grazing Leases Altered

Information has been received in reference to amendments to the grazing leases from the Timber and Grazing Lands Branch at Ottawa, in respect to an Order-in-Council dated April 12th and applicable to Manitoba, Saskatchewan, Alberta and the Peace River tract. According to the document, "Provision is made for the renewal of grazing leases now in existence, having less than five years to run, for the payment of rental at the rate of two cents per acre per annum. This is compensation for improvements let by a lessee on his leasehold. The four years cancellation is eliminated."

Worms cause restlessness and rob the infant of sleep, the great nourisher. Mother Graves' Worm Expeller will clear the stomach and intestines and restore healthfulness.

France Has Largest-Sailing Ship

The largest sailing ship afloat is a French five-masted, La France, a steel-hulled 5,632 tons burden, which carries 30 sails and a crew of 150. Her best weather-run is 322 knots in a 24-hour day, though she has logged as much as 421 knots in a hurricane. Not many steam freighters could better those figures.

Mrs. Edmonds Makes Gain Of Fifteen Pounds

"I Honestly Believe Tanlac Saved Her Life," Declares Husband In Remarkable Statement Praising Master Medicine.

"The way Tanlac has restored my wife's health and built her up makes me one of the happiest men in Canada," said Wm. A. Edmonds, 598 King Edward St., Winnipeg.

"Two years ago her health began failing and she suffered terribly from indigestion, gas on the stomach and heart palpitation. Her head and back pained her continually and she had nervous spells when she would shake like a leaf. Finally her strength left her entirely and she was confined to her bed for one solid year."

"Everything possible was done for her and almost as a last resort, I had her try Tanlac. After taking it awhile she began to improve, and today her health is fully restored. She is not only in splendid health, but she has gained fifteen pounds in weight. I honestly believe Tanlac saved her life, and I am more than grateful."

Tanlac is sold by all good druggists.

Save the Surface

America Spends Almost as Much on Cosmetics as on Education

The American people spend annually \$750,000,000 for face powder, cosmetics and perfumery, and \$1,000,000,000 for education. It is interesting to note that the amount America spends annually for face powder and its accessories is almost as much as she spends for her entire educational system. Looks as if America thought about as much of the outside of her head as of the inside. And as a matter of astonishing fact, the amount actually spent by America for face paint annually exceeds all she pays for the salaries of the teachers in all the high schools who are trying to get something into the heads of pupils in between times while they are applying the paint on the surface.—The Christian Herald.

Praises this Asthma Remedy. A grateful user of Dr. J. D. Kellogg's Asthma Remedy finds it the only remedy that will give relief, though for thirteen years he had sought other help. Years of needless suffering may be prevented by using this wonderful remedy at the first warning of trouble. Its use is simple, its cost is slight, and it can be purchased at most anywhere.

Growth of Canadian Industry

Illustrating the growth of the manufacturing industry in Canada, J. S. McKinnon, president of the Canadian Manufacturers' Association, stated that Canada's exports of manufactured goods represented in value \$47 per head of population, whilst the export of United States manufactured goods represented \$50 per head of population.

CORNS

Lift Off with Fingers

Severe shocks have been experienced by unsuspecting people, who have investigated too closely the "perpetual motion" of the leaflets, and it is conceivable that to anyone with a weak heart—such shocks might prove fatal.

Doesn't hurt a bit! Drop a new "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers. Truly!

"Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes and the calluses, without soreness or irritation.

Chinese Guarded Silk Secret For centuries after its first discovery China carefully preserved the secret of silk culture and amassed great wealth by exporting it to India, Persia and Arabia.

MURINE Night and Morning—Have Clean, Healthy Eyes. If they Tingle, Itch, Smart or Burn, If Irritated, Inflamed or Your Eyes Granulated, use Murine often. Refreshes, Soothes, Safe for Infant or Adult. At All Druggists and Opticians. Write for Free Eye Book. Write to Murine Co., Chicago.

IT HELPS

Coughs, colds, chronic Indigestion and Constipation are simply due to the torpid condition of the mucous membrane. The way to relief is to take a course of Dr. J.C. Peppermint Cure. It will do it. It is the only medicine that will do it. It is the only medicine that will do it.

DR. J.C. PEPPERMINT CURE

Has been used for over 100 years. It is the only medicine that will do it. It is the only medicine that will do it.

PE-PU-NA COMPANY
34 St. Paul St., Montreal

Labor Saving Devices Make For Efficiency, But Kill Individuality

Complaint is made that it is almost impossible to obtain competent watch repairers, the reason being that time pieces are now so largely made by machinery, that it is no one man's business to know all the ins and outs of the delicate mechanism contained therein. So it is that watches, which if properly repaired by competent workmen, would last two or three generations as our fathers' time pieces did, are now after a few years thrown into the discard and new ones purchased. On the other hand, we have this to counterbalance it. Cheaper watches than in the old hand-made days, and incidentally more money to buy them with. Whether or not the machine-made watch is as good a time piece as the machine-made article we will allow others to judge.

In any event what is happening in respect to watches and watch repairers is going on in nearly all other industries. Take the shoemaker. The old boy who made shoes a generation ago, all by hand, and took an intelligent pride in his craftsmanship, is now about as scarce as the wild pigeon. Possibly he will still find in the back concessions somewhere, but even that is to be doubted. The modern shoemaker works in a factory. He does one job on a pair of shoes, and probably does it very well. But bless your heart, that is about all he can do.

In the same way the old-time iron worker. He was most often just a plain blacksmith plus brains and art sufficient to turn you out a beautiful pair of wrought fire dogs. But, alas, he is also becoming ever more scarce. And irons are now stamped out in a big factory from a scale pattern. They are machine-made, and they look like the same thing, from beginning to end. Now, however, you have linotype hands, and make-up hands, and press feeders and press men, with here and there a job hand, and rightly here they know anything of the other man's work.

All this, of course, is efficiency stuff. It runs through all industry. It may be rank heresy, but in my humble opinion it also makes work gray and uninteresting. A man in this world gets a stock of envelopes into a feeder, sees that his form is adjusted and pulls a lever. Away they go, eight or nine thousand an hour. All the workman has to do is to keep the ink feeding properly, and the maw of the machine filled with material. The machine does the rest.

Take that prince of craftsmen, the cabinet maker who has graduated into a cabinet maker. He still exists, I am glad to say, but ever in diminishing numbers. Take the furniture he made years ago and compare it with the machine shop of today. See how the drawers move in the old-time pieces, and how it holds together in spite of our over-heated, dried-out homes. There is joy in the work of the cabinet maker who sees the artist's results as they grow under his hand, by his. But how of the joy of the factory where you shove a board in at one end of a complicated machine to see it arrive at the other end the completed northeast side of a cabinet, going west.

Of course this is all part of an old-fashioned idea that there is joy in work. Something beyond the mere stipend that one receives for his labors. But there is also this thought, that while we have gained in production, in cheapness and all that, we have at the same time lost something through the introduction of labor-saving devices, a thing that will perhaps never regain. And that is individuality. From the Toronto Saturday Night.

Money for Roads

Of the \$2,035,932 voted by the Saskatchewan Legislature for public improvements for 1922, approximately \$1,570,000 will be spent on roads and large capital bridges this season. It has been announced by J. C. Gardiner, Provincial Minister of Highways. This expenditure will be apportioned as follows: Roads constructed under the Federal aid scheme, \$500,000; large steel and concrete bridges, \$120,000; main market roads, \$550,000.

See others sleep on their backs on the top of the water or in ice with the young otters in their paws.

Canadians Did Regular Fighting

Comparison Made on Record in Last Hundred Days of the War

While military defence was under discussion in the House of Commons, Brigadier-General J. A. Clark (Conservative, Burrard, B.C.), compared the work accomplished by the Canadian and United States forces in the last one hundred days of the war, to show how Canadian forces had been benefited by actual war experience.

The United States, said the General, entered the war three years after Canada and therefore was not able to make the showing Canada did. During the last one hundred days the United States had 650,000 men in action and Canada 165,000.

United States troops were engaged for twenty-seven days and Canadian troops for one hundred days. United States battle casualties numbered approximately 160,000, and Canada's approximately 45,000 during the period.

United States troops captured 16,000 prisoners, and Canadian troops 35,500. United States troops captured 486 guns, as compared with 623 by the Canadians; 2,864 machine guns, as compared with 2,542 by the Canadians; 177 trench mortars, as compared with 336. During the last one hundred days, United States troops fired 410 square miles and Canadian troops 509 square miles. Americans advanced 34 miles, as compared with 86 miles advanced by Canadians.

General Clark drew the comparison to show how Canadian forces had been benefited by actual war experience.

American Capital in Canada

Asserted that Americans Largely Control Important Canadian Industries

The Trade Commission of the Dominion has just published an analysis showing that 75 per cent. of the capital of Canadian manufacturing establishments is owned by citizens of the United States; 50 per cent. by Canadians; 9 per cent. by persons living in Great Britain and 6 per cent. by other countries. The invasion of American capital has been going on apace, says a Toronto correspondent of the New York World. Canadian business authorities believe "that at the present time American ownership is largely in the hands of the United States. The proportion today is larger."

In the rubber industry 50 per cent. of the stocks and bonds representing ownership is American, 40 per cent. Canadian, 2 per cent. British, 8 per cent. other countries.

In railway car construction 54 per cent. is American, 46 per cent. Canadian.

In petroleum refining 53.1 per cent. is American, 46.7 per cent. Canadian, one-fifth of 1 per cent. British.

In lumbering, oldest and most profitable of Canadian industries, Canadians retain only 61 per cent., Americans hold 27 per cent., and British 11 per cent.

In pulp and paper concerns Canadians own 68 per cent., Americans 24 per cent., British 4, and other countries 4.

In electrical apparatus 49 per cent. is American, 36 per cent. Canadian, 12 per cent. British, 3 per cent. other countries.

And so on through the whole list. One estimate is that there is from \$700,000,000 to \$800,000,000 of American capital invested in Canadian industry. Some might put the figure at an even billion. Literary Digest.

Lumber Production Value

Figures recently issued by the Dominion Bureau of Statistics show that the 1920 lumber production in Canada was valued at \$11,515,393, as compared with \$22,322,975 in 1919. Of the 1920 total sawn lumber accounted for \$168,368,437; lath, \$5,248,579; shingles, \$14,695,159; other mill products, \$7,496,706; and forest products, \$116,006,112. Cedar, spruce, Douglas fir, white pine, birch, maple and hemlock were the most important woods used.

Dairy Calf Profitable

Product Should be Made Attractive for Market

"In Holland, where the cattle are all of dairy type and breed, veal is perhaps the most palatable and tempting meat product offered on the menu. The same is true of France. Veal in England is also good. The result is that in all these countries the demand exceeds the supply and prices have risen to such an extent that even in England the slaughter of veal calves has threatened the maintenance of the beef population of the country. The dairy calf may be made to contribute a profitable return to its owner, and a substantial addition to our meat supply, but he must be fed and marketed as a calf. There is no place for the dairy steer, whether reared around a straw stack or given decent feed in a comfortable barn."

"The dairy calf is going to be with us in increasing numbers, and, as the product is not exportable, we may as well accept the task of putting it upon the market in an attractive and palatable form as possible, in order that by increasing consumption we may develop an outlet which will regularly and profitably absorb all that we can produce."—Mr. H. S. Arkell, Dominion Livestock Commissioner.

An American Compliment

Say British Always Know When to do Right Thing

The British are a very great people. The marriage of the Princess Mary is only another example of how they manage to do the right thing before the crack of doom. Remember the World War and how the British Empire came out of it bigger than ever. Look at Ireland—four years given up as hopeless. Think of Balfour coming to Washington, and putting across the four-power treaty, while getting the naval hold, and going home with both Japan and America the sworn friends of old John Bull. No people on earth today have political talent, experience and skill equal to the British. Congratulate to the former Princess, now a humble Viscountess; and, if you please, felicitate to old England on leading the world just by poise and

Fertile Land of Peace River

Could Produce More Wheat than the Record Production to Date of all Western Canada

"The Peace River country is capable of producing more wheat than the record production to date in the whole of Western Canada, was one of the interesting statements of John M. Hurie, managing director of the Edmonton Journal, in an address to the faculty and students of Upper Canada College at Toronto recently. Mr. Hurie said he had seen growing vegetables and flowers at Fort Vermilion, 600 miles north of Edmonton, equal to anything he had seen in the gardens of Ontario. Wheat yields of fifty and sixty bushels to the acre were frequently secured."

Jack Spratt could eat no fat; his wife could eat no lean. You see, they spent their money for the jitney's gasoline. Fresno Republican.

Let those who would affect singularity with success first determine to be very virtuous, and they will be sure to be very singular.

Instead of doing things today, the wise man did them yesterday.

Wife in no manner a joke.

WESTERN EDITORS

H. D. Pedlar, Editor of The Herald, Oxbow, Saskatchewan.

Prairie Province Horticulture

Tests Made of Fruits and Flowers at Dominion Experimental Farms

The cultivation of fruit and flowers in the prairie provinces is beset by more difficulties than it is in the eastern provinces and in British Columbia. However, as the provinces become more settled, protection is to some extent provided against the sweeping winds. In many places, trees are now being planted as wind breaks. At all the Dominion Experimental Farms and Stations some attention is paid both to fruit and flower growing. At Brandon, Man., the average yield from six bushes of Magna bush currant for three years was 43 lbs. 15 oz., and from Kerry 21 lbs. Red Cross currants gave an average yield from six bushes in the same time of 20 lbs. 8 oz., and Large White currants an average yield from six bushes of 11 lbs. 13 oz. Gooseberries, raspberries and strawberries are also included in the tests and promise well. Attempts to produce a hardy standard apple have not hitherto proved successful, but several varieties of crab apple are yielding abundantly. Several hardy varieties of perennial flowering plants do well, as do tulips and similar bulbs.

At Brandon, Man., too, ornamental shrubs are maintained and given a deal of information to visitors. Tree fruits have not had much success at the Lacombe, Alberta, experimental station, but good results have been obtained with small fruits, including red and black currants, raspberries, gooseberries and strawberries. Many ornamental trees and shrubs and various varieties of perennials are successful there, as well as at the Scott, Saskatchewan, station. No success has been met with apples, but Manitoba plums, brought from Brandon, have thriven. Caragana hedges at Scott have furnished good protection to bush fruits. Black, red and white currants have all proved vigorous. Eclipse and Topsey the best in black currants, Red Cross and Ruby Castle in red, and White Cherry in white. Houghton gooseberries, Sunbeam raspberries and Dakota strawberries have yielded good crops and other varieties of the same fruits have not done badly. Much valuable information could be obtained by growers by applying to the nearest experimental farm or experimental station, or to the Publications Branch, Ottawa, for copies of the superintendent's reports.

Americans Gain New Insight Into The Status Of The Commonwealth Of Australia

"Looking Backward"

Some of Bellamy's Predictions Come True Sooner than Expected

When Edward Bellamy, 35 years ago, wrote his fascinating prophecy, "Looking Backward" from the year 2000, people gasped at the daring while appreciating his imagination. In one astounding chapter the "Rip Van Winkle" of the narrative is taken to the music room, where he is asked to make known his choice from a very long 24-hour music programme. He indicates an organ piece, his hostless "made me sit down comfortably, and, crossing the room, so far as I could see, merely touched one or two screws, and at once the room was filled with the music of a grand organ anthem."

Such an incredibly prophecy that the Bellamy work was classified in the libraries as "fiction," and so speedily has scientific development occurred that in many libraries it is still "fiction." Yet this is only 1922, not 2000, and by the time the Bellamy era of prediction is reached, who dares to foretell the achievements of men.—The Detroit News.

Cabinet Ministers' Religion

Personnel and Religion of All Members of the Dominion Cabinet

The personnel of the King cabinet and the religion of each member are as follows:

Hon. W. L. Mackenzie King, Premier, Presbyterian; Hon. W. S. Fielding, finance, Baptist; Hon. G. P. Graham, justice, Catholic; Hon. J. G. Macdonald, justice, Methodist; Hon. Charles Murphy, postmaster-general, Roman Catholic; Hon. H. S. Bland, health, etc., Roman Catholic; Hon. J. H. King, public works, Baptist; Sir Lomer Gouin, justice, Roman Catholic; Hon. Jacques Bouchard, customs, Roman Catholic; Hon. Ernest Lapointe, marine and fisheries, Roman Catholic; Hon. D. D. Mackenzie, solicitor-general, Methodist; Hon. J. A. Robb, trade and commerce, Presbyterian; Hon. Arthur Meighen, minister of state, Presbyterian; Hon. W. G. Kellock, railways and canals, Roman Catholic; Hon. Charles Stewart, labor, Church of England; Hon. W. R. Motherwell, agriculture, Presbyterian; Hon. James Murdoch, labor, Methodist; Hon. John E. Sinclair, without portfolio, Presbyterian; Hon. Thomas A. Low, without portfolio, Methodist; and Hon. Raoul Dandurand, without portfolio, Roman Catholic.

H. B. Co. to Enter Siberia

Will Open Up Virgin Territory for Trading

The Siberian venture of the Hudson's Bay Company this year is one of great magnitude, and one entire wharf in Vancouver is piled high with trade goods and supplies.

Two Hudson Bay steamers are now loading, another will load later in the season, and two others will pick up their cargoes in Japan, making five ships in all. They are taking every conceivable variety of goods from apples to zithers. The two vessels now loading will go to Anadir, Siberia headquarters of the company. The Lady Kindersley sailing from here in June, will go first to Coronation Gulf and Herschel Island near the mouth of Mackenzie River, and will then proceed to Anadir. Besides a number of launches, cut to fit storehouses and residences, and enormous quantities of food are being sent aboard the vessels now loading. The launches will penetrate hundreds of miles up the Siberian rivers where a virgin territory will be opened up.

Asleep at the Switch

A man who believed he knew all about parrots undertook to teach what he thought to be a young male bird to say "Hello!" in one lesson. Going up to its cage, he repeated that word in a clear voice for several minutes, the parrot paying not the slightest attention. At the final "Hello!" the third bird opened one eye, gazed at the man and snapped out, "Line's busy!"

Russian Business Free

Complete freedom of mercantile business in Russia has been authorized by the council of commissars. The council has issued a decree which makes it possible to open shops without permits. It is necessary only to register with the police, who must consent to the opening of a place of business immediately, except in case of wine shops, for which special permits will be required.

It pays to patronize home industry. Buy from the merchants in your own town.

These are the days when the Americans are learning geography, and must continue to learn it if they are to prosper and keep their place in the world. We are just beginning to absorb the geography of the Pacific, thanks to the Washington conference; but many of us still have a confused mental picture of an important factor in the Pacific as Australia. We rather picture it as a bushy, desert island inhabited by soldiers with brim-top Stetson hats, naked blackfellows and kangaroos.

This impression has been absolutely changed for those who heard Senator George Foster Pearce, Australian delegate to the Arms Conference, address the great banquet of the English-speaking Union at the Drake. Senator Pearce portrayed his country as another big English-speaking commonwealth fronting on the United States, with the same lack of international covetousness, and the same ambition to maintain peace and the status quo.

Australia is a vast island, 97 per cent. of size of the continental United States. Its lucky number seems to be 97, for 97 per cent. of its population of 5,500,000 souls are of English descent. It is therefore a great unsettled country, thinly populated by English-speaking white men. It is rich in resources and vigorous in its national life; its mobilized troops in the late war numbered close to half a million, of whom 300,000 went overseas and 90,000 were killed. It is a determined scrappy community, with which no one not prepared for big trouble would be apt to take any liberties.

The Australian commonwealth, though part of the British Empire, is a self-governing democracy more dominated by labor than any other British dominion. Senator Pearce, who, though a comparatively young man, must be counted one of her elder statesmen; having been a member of the Dominion Senate since its founding in 1901, began his working life as a carpenter and was afterward an organizer of defense (his name for the state, as fact or fiction, is the government in the absence of Premier Hughes, and has represented Australia at conferences of the Empire and at the Washington conference. Over here we wouldn't trust a carpenter so far.

This power-wants stability in the Pacific, just as we do and Canada does. Its great open spaces are only a few days sailing from the crowded hordes of Asia, but are five weeks from Great Britain. The Australians and Canadians are our kind of people, with problems like America's and with the same desire for peace and steadiness in which to work them out. These commonwealths are more and more dominating British policy in the Pacific and will continue to do so. It is therefore very largely with them that we are asked to co-operate in the Washington treaties. If we can't trust democracies of "regular fellows" like ourselves, we must make up our minds to draw our head into our shell and live the life of a turtle.—Chicago Evening Post.

Want Federal Assistance

Million Bushels of Potatoes May be Destroyed Unless Aid is Given

That there was a danger of nearly a million bushels of potatoes being thrown out to rot in the fields unless the farmers of the Maritime Provinces and particularly of New Brunswick, were given some Government assistance in marketing their crop, was the declaration made by a deputation representing New Brunswick potato growers which waited on Hon. W. R. Motherwell, Minister of Agriculture, recently. High freight rates and the United States tariff were largely blamed for the present condition. Hon. Mr. Motherwell promised the matter would be given every consideration possible at the hands of the Government.

But Not Vice Versa

When little Percival arrived at school on the opening day, he carried the following note to the teacher:

"Dear Teacher: Our sweet little Percival is a very delicate, nervous child, and if he is naughty—and he is likely to be naughty at times—just punish the boy next to him, and that will frighten him so he'll be good."

Soft Pedal!

Curate (referring to a slightly intoxicated fare):—"Conductors do you allow drunken men on these cars?" Conductor (in a whisper):—"It will be all right, sir, if you don't get too noisy."

The Right Way and the Only Way a Royalty Company can Make You All the Money You are Entitled To!

1—REMEMBER. Drilling operations will begin on our holdings in the Kevin field by June 15th.

2—REMEMBER. In order to make big money out of the oil business that a company must first secure all the leases that they can, in as many different promising oil structures as possible. Then by selling part of them for cash, and sub-leasing part of them on royalty basis, the company is sure to make for its shareholders the largest possible returns on their investment that can be made in the oil business. You can't beat this method for making sure money out of the oil business. It takes combined capital to make money—our reason for offering these shares to you.

3—REMEMBER. The Organizers and TRUSTEES OF THE HOLDING & ROYALTY COMPANY have before them statements of several other companies who are engaged in the same way of making money out of oil as THE HOLDING & ROYALTY COMPANY; one of whose shares are par value \$100, paid to shareholders in four years \$80.00 per share in cash dividends besides constantly adding to the assets of the company. Another incorporated in Colorado in 1912, has never missed paying a dividend, and has paid in dividends 102 per cent. Another, the Consolidated Royalty Company of Wyoming, annual report for 1920, shows a net revenue of \$755,505 compared with \$393,800 for the preceding year, or a gain of more than 100 per cent in twelve months period. This excellent income was made at a cost of only \$40,583.

4—REMEMBER. An oil lease may only be worth \$1,000.00 today, but tomorrow it can be worth \$100,000.00.

5—REMEMBER. The above statements go to show you the large returns that you can anticipate from an investment made in a company who are operating along these lines.

6—REMEMBER. Our Land Department is a going concern, holding under option and sales contracts, thousands of acres of fine farm lands, ranches, and city property.

7—REMEMBER. Our Oil Lease and Royalty Department have for negotiation over 50,000 acres of Oil Leases in the Sweet Grass Arch and other different promising oil fields throughout Montana.

8—REMEMBER. Our Oil Field Supply Department handles every kind of material used in oil field work, orders for both NEW AND SECOND HAND star and a standard drilling machine, casing, piping, cables, are being

ing negotiated for oil operators through this department for the new oil fields of the Sweet Grass Arch.

9—REMEMBER. OUR CAPITALIZATION IS LOW, as follows:

Divided into 40,000 7 per cent preferred shares par value \$1.00 with cumulative dividends; and \$5,000 common shares of no par value each. The Company offers the unsold part of 40,000 shares par value \$1.00 preferred 7 per cent cumulative, at par \$1.00 with a bonus of the common shares of the company.

10—REMEMBER. Our By-Laws read that 50 per cent of all moneys received from the net income of oil royalties, oil leases and the sale of Real Estate and other property is to be paid to the common shareholders, while the preferred shares entitle you to first rights on the other 50 per cent and accumulative assets with 7 per cent cumulative dividends on your investment in these preferred shares.

11—REMEMBER. Unsold capital shares of the Company will be sold on the following basis, subject to advance price on the free common shares without notice:

Only a few hundred shares are still to be had of the Issue B—which carries (1) common share as a bonus or 200 shares for each \$100.00. Issue C. 10,000 preferred carries (1) common as bonus or 150 shares for each \$150.00. Issue D. 15,000 preferred carries (1) common as a bonus or 120 shares for each \$100.00.

12—REMEMBER. If the Companies Exchange Department is able to make sales and transfers of 50,000 acres of oil Leases per year at a net profit of from \$1.00 to \$5.00 per acre, it would net an annual income of our SHAREHOLDERS of about five times its low cash CAPITALIZATION of \$40,000. Besides the Cash Commission received in making these sales the Company would endeavour at all times to retain a small royalty interest in all oil leases transferred.

13—REMEMBER. All departments of this Company are managed by old experienced oil operators, lease and real estate men.

14—REMEMBER. You will participate in all earnings and profits of this Company. You cannot afford to pass this up.

15—REMEMBER. \$100.00 invested in these SHARES OF INTEREST can easily grow to HUNDREDS.

16—REMEMBER. The sooner your subscription is sent in the more SHARES you will get for each \$100.00 invested.

Black Magic's First Well

In the Famous Section 16

Is Completely Financed

THROUGH ADVANTAGEOUS CONNECTIONS BLACK MAGIC IS NOW ASSURED THE COMPLETION OF ITS FIRST WELL IN THE PROVEN SECTION 16 TO THE PROBABLE PRODUCING OIL SANDS. WE ARE WORKING WITH ALL SPEED TO SPUD IN BEFORE THE END OF THE MONTH.

THE RIG IS COMPLETED, THE MACHINERY INSTALLED, AMPLE WATER FOR DRILLING HAS BEEN STORED IN OUR RESERVOIR AND ALL WE NEED NOW FOR THE "GO AHEAD" IS THE INSTALLATION OF THE BOILER, WHICH WILL PROBABLY BE FINISHED BEFORE YOU READ THIS ADVERTISEMENT.

Do You want to make your Fortune Soon

Black Magic is going to work rapidly in the drilling to production of eight wells on its first tract near the Gordon Campbell producer. It should be only a matter of a few months at the most until Black Magic is paying big dividends to all those who at this time put their money in with the mon-

ey of those who are working night and day to make the biggest dividends possible from Black Magic's valuable holdings. Those who invest all they can now in Black Magic shares at \$1 par stand to make their fortunes as soon as well No. 1, now completely financed, is brought into production.

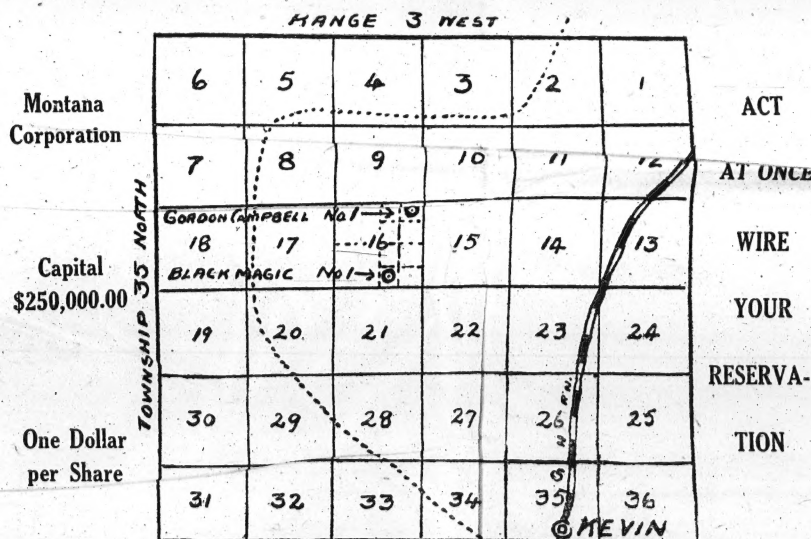

Figure It Yourself--

From 4,000 barrels net, the **LOWEST** amount it is reasonable to expect from 8 wells drilled on our tract No. 1 so near production—from 4,000 barrels with oil at the low price of \$2.00 per barrel (it will be much higher in the near future from all indications) Black Magic would reap \$8,000 a day or \$240,000 in 30 days. Our capitalization is only \$250,000.00 (shares \$1 par) so that it is easily seen how favorably our chances are of paying big dividends on so low capitalization very soon after our wells begin producing. Take your pencil and paper and figure it out for yourself even closer (a clear conscience prevents us

figuring it any lower than above) than our figures and you cannot help being convinced that in Black Magic you have an A-No. 1 investment chance for making your fortune.

After you have figured it out from all angles, to your heart's content, we believe you will either send in your subscription immediately or will want to know more about this wonderful opportunity. The two blanks below are for your use in either case. We hope, however, that you are already so assured of making money from Black Magic Oil, as we are, that you will want to help us **NOW** to get the oil and later share with us, and share alike in proportion to your investment, in the profits, by using the blank in the right hand corner below, at once.

WARNING! Say "Bayer" when you buy Aspirin. Unless you see the name "Bayer" on tablets, you are not getting Aspirin at all. Why take chances?

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and dose worked out by physicians during 22 years and proved safe by millions for

Colds Headache Rheumatism
Toothache Neuralgia Neuritis
Earache Lumbago Pain, Pain

Many "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists. Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Meno-chemicals of Germany. It is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

MY CANADA

—BY—
ELINOR MARSDEN ELLIOT
Published by Special Arrangement
with the Author

III. Winnipeg
June 8th, 19—

I have just returned from a shipping expedition taken in company with Mrs. Arnold and Mary. I really need nothing, but they told me that shipping in Winnipeg is as interesting, as instructive, and almost as expensive as European travel, so of course I went with them.

We went first of all to the Hudson's Bay Stores. Fresh from the reading of Agnes C. Laut's "Lords of the North," I was rather disappointed to see an up-to-date departmental store where I had not more than half expected to find a log fort with cannon guarding the gates.

However, when I saw a mixture of prosaic common-sense and irresponsible non-sense in the (7) with a romantic temperament, tells me that there is an indescribable but unmistakable character about where in all Hudson's Bay Stores, whether they be of the modern or of the pioneer type. This she explains is due to the peculiar odour that is found in them all, an odour of smoke-fanned leather, fish, and the home-made tobacco smoked by the Indians and half-breeds.

"You may laugh if you please," she said in response to Mrs. Arnold's unbelieving smile, "but I am sure that I, blindfolded, could pick out a Hudson's Bay Store at a hundred yards! I have been in five, and the same perfume—to be polite—hangs over them all. I like it, but I can imagine that to the unsinitiated it might be anything but pleasant."

Probably the damp climate of England has blunted my sense of smell. At any rate, I was not able to reconstruct the old fur-trading days on the strength of it.

From the Hudson's Bay we went to Eaton's—a truly marvellous shop where one can buy anything from a paper of pins to a motor-car. But the most interesting thing I saw was the promised substitute for European travel; this was a party of Galician women, in their native costume, who gathered around a bargain counter on which was displayed "Canadian clothes" of the most violent colours. One smart maiden, who had evidently been in Canada for some time, was acting as guide and interpreter to her country cousins, and I could not but help notice how much nicer the others looked than she. Miss Sophistication wore a very tight skirt, a bright purple blouse with very short sleeves, and I am sure that her hat was trimmed by a landscape gardener. But I suppose she felt happy in the knowledge that she no longer looked the peasant—and perhaps the next generation will learn to choose clothes to suit their short, squat figures and broad faces.

I know that I am committing a platitude when I speak of Winnipeg

her dependence owing a distinct personality. As Mary quoted today, "A Nation spoke to a Nation. Anna Queen sent word to a Throne. 'Daughter am I in my Mother's house But mistress in my own.'"
(To be continued)

Canada's Crucifixion

How the Canadians Held Back the Germans at St. Julien

North, over the border, today, in every community heart-hearted citizens of the Dominion are holding commemorative services for the sons of the maple, lying in Flanders Fields, who held the line for liberty from April 22 to April 24 seven years ago. In proud and loving memory mothers and fathers of these heroes recall the battle of battles of the world war, in which the picked conscripts of continental Europe hurled themselves for three consecutive days on the flower of youth of Canada, and in the end retired baffled, leaving on the field thrice 10,000 dead.

The true story of the world's salvation from militarism by that little band of stalwart souls, known as the First Canadian Division, history will tell. The battle of St. Julien was the start of a series of displays of Canadian heroism and efficiency that marked the Flanders and Picher campaigns of the great war wherever emergency occurred, and which has added to the glories of patriotic achievement the "events chronicled by the names of Desbarrats, Givens, Viny, Cambal and a score more.

Untrained men from farm and factory numbering less than 10,000 had been placed between two French armies to block the enemy's determination to achieve the French channel ports. To Van Falkenay's command the Canadians and break through, no matter the cost an answer was given which ranks St. Julien with Thermopylae and the Alamo, with the difference that St. Julien had her messengers of victory, albeit they numbered but 400, all that was left of Canada's vanguard in the fight for civilization.

Decried by the Algerians on its left; its right bled by the retreat of the extreme eastern French wing, this pigmy army stood. Defying the repeated charges of the Germans, of which dissolved themselves against that unbreakable human wall; scornful alike of gas and bomb these Canadians fought for 72 hours to achieve the result their commander curiously ordered in the woods: "The line across St. Julien wood must be held. The Canadians will hold it."

And when, after the three-day agony, the third British army came to the relief and the battered men of the western continent marched out, no more inspiring sight was ever witnessed than the little army passing through in facing serried ranks a seasoned British warriors, each right by standing at "the present."

The salute of St. Julien is Canada's forever!—The Cleveland (Ohio) Commercial.

Locating Empire War Graves

Over 600,000 Registered to End March, 1921

It is stated in the annual report of the imperial war graves commission that of the total British death casualties of approximately a million during the war (excluding Dominion, India and colonial forces) some 619,000 graves had been located and registered by March 31, 1921.

The areas into which the battle zones of France and Belgium are divided for the purposes of the commission are, among other facts, mentioned in the report. The headquarters have been established at S. Omer, with branch offices in each of the five areas into which the country has been divided.

In Italy the work of the commission is further advanced than in any other theatre of war, and there will be some thirteen main cemeteries, constructional work on which, it is hoped, will be completed this month. In Egypt the work of concentrating isolated graves has been completed, although some few scattered graves in the western desert and in the Sudan remain to be brought in. It is proposed to erect a general memorial to the members of the Egyptian Labor Corps and the Camel Transport Corps who laid down their lives.

Palestine will have eight main cemeteries: Macedonia, 10; Gallipoli and the Aegean, 28, confining some 10,000 known graves. There are also some twenty thousand soldiers with no known graves in this area, and the method of commemorating them is under consideration. Over seven thousand graves have been located and identified in Mesopotamia.

Oxygen breathed in by any person can be measured by a newly designed apparatus.

He Is Satisfied With the Results

THAT'S WHY HE PRAISES DODD'S KIDNEY PILLS

Quebec Man Who Suffered from Bright's Disease, Diabetes and Backache Gave a Thorough Test to Dodd's Kidney Pills.

St. Prosper, Dorchester Co., Que. (Special).—Mr. Joseph Larochelle, well known and highly respected here, is telling all his friends of the satisfaction he got from the use of Dodd's Kidney Pills.

"I suffered for many years from Bright's disease, diabetes, backache and headache," Mr. Larochelle states. "I took from 10 to 15 boxes of Dodd's Kidney Pills."

"I can tell you I am satisfied with the results. I advise all who use Dodd's Kidney Pills to take enough to make them well."

Dodd's Kidney Pills have been in use in Canada for more than a quarter of a century. They are known by the good neighbors if Dodd's Kidney Pills do not make healthy kidneys.

Fiji Island Chief an Oxford Man. One of the chiefs of the Fiji has a remarkable record. Descendant of a famous line of chieftains, he is also an Oxford graduate, served as cook with the R.M.A. Corps in France in 1916, and later as a clerk with the Royal Scotch Borders.

He has been medaled by King George for bravery. Despite his good running start, he has deserted civilization and returned to the South Pacific to live among his fellow Fiji Islanders.

Countries would not be so anxious to enter war if it was operated on the pay-as-you-enter plan.

Over 500 tons of flowers are sent annually from the Sicily islands.

Engage in Business Enterprise

Western Canada women are continually finding novel outlets for the expression of that new independence the war gave them. The Ladies' Touting Cars, Ltd., capitalized at \$20,000, has just been incorporated at Vancouver, the Hon. Mary Ellen Smith, member of the provincial cabinet, being president. The company directors and employees are all women who have driven motor cars overseas, and they will cater to women tourists to the city and district.

LAST week's story told you of Pimzie's enjoyment as he lay in less than an inch of water amongst the pools between the low tide rocks and of his great enjoyment in watching the numerous Hermit Crabs dangle and there, having perfectly awful miniature fights, and of one particular crab that, having lost his shell (Pimzie mischievously having taken it away), was hustling around trying to find another one through theft or murder, or any way possible.

Have you ever lain among the sandy spots that are exposed at low water and watched the tiny creatures left there by the receding sea? I have, and I soon learned what great fun it is.

I have stayed for hours, or to be quite exact, until the morning light has sent me home and have been held perfectly fascinated all these hours by the comedies and tragedies that I have watched as they unfolded before me. Try it some time and write me what you have seen and learned.

In the pool where Pimzie lurked, he saw so many Hermit Crabs that he even fixed up races and, placing several in line, he bet to himself on which of them would reach a certain place first. He saw the little named Hermit (whose shell he had hidden) rush madly up to several other Hermits who were the pleased possessors of comfortable shells of their own and try to fight them out. Pimzie also noticed that he had no luck and scuttled around more madly than ever; after each unsuccessful attempt on his stronger neighbors.

Oh! How Pimzie enjoyed it!

But we recited to put the shell he had hidden back in the exact spot where he had found it, and see what would happen.

I don't know whether it was instinct or what you would call it, but the moment the shell was placed there its owner seemed to know it and hustled back just as fast as he could move.

He backed up to it and shoved himself in, back first. Once in. What a difference in his whole appearance! Instead of the cringing, frightened, timid little thing he had been, he suddenly became the boldest of the bold. Sticking his forelegs out or the opening of his own beloved and recovered shell, he flashed his sparkling eyes and waved his paws around in ever so threatening manner, looking for all the world like the lord and master of his own castle. . . . or rather shell, which is exactly what he was, was ever so bold NOW!

Now! He completely forgot that he had been just as timid as he had been back in it.

As you know, these Hermit Crabs are hatched without any shells of their own. Their bodies are totally bare and unprotected, so that they must in all cases try to fight out the rightful owners. . . . therefore, all the battles.

Pimzie certainly enjoyed himself! What small boy does not enjoy a fight?

Headache

Recurring headaches usually come from an exhaustion of the nervous system, and they do not disappear until the vigor of the nerve cells is restored by such up-building treatment as Dr. Chase's Nerve Food.

Temporary relief by use of powders is often obtained at an enormous expense to the nervous system and the general health.

Get the nerves right and the headaches will not return.

Mrs. W. J. Pearce, Nunn St., Cobourg, Ont., writes:

"My system became run-down and I suffered greatly with pain in my head. This was so severe that I should have found quite an improvement in my condition. I continued using them until I had taken about seven boxes, and they strengthened and built up my system splendidly, completely relieving the pain in my head."

Dr. Chase's Nerve Food, 50c a box, all dealers, or Edmondson, Bates & Co., Limited, Toronto.

A Combination Of Straw And Feathers

A crown of straw, a brim of feathers, in loosely drawn strands, make up this charming little hat, which is sure to enhance the charms of the most beautiful face. It is a decidedly stunning model and one that will find favor in the eyes of most women. The disk of straw which adorns the peak makes it distinctly Russian in model.

The Chief Danger

"Are you going any further West?" "I planned to do so," said the foreign visitor. "Is there any danger from Indians?"

"Not if you keep out of the way of their motor cars,"—Birmingham Age-Herald.

Ways of Measuring

How Lloyd George Got Even With the Chairman

A correspondent sends us the following little anecdote illustrating Lloyd George's ready wit. On one occasion when he was to address a meeting in South Wales, the chairman, thinking to be funny at the speaker's expense, said in introducing him, "I heard so much about Mr. Lloyd George that I naturally expected to meet a big man in every sense, but, as you can see, he is very small in stature."

Lloyd George arose. "I am grieved to find," he said, "that your chairman is disappointed in my size, but this is the way you have been measuring a man. In North Wales we measure a man from his chin up, but you evidently measure him from his chin down."

After that the chairman made no more personal remarks.

SATISFIED MOTHERS

No other medicine gives the same satisfaction to mothers as to Baby's Own Tablets. They are equally good for the newborn babe or the growing child and are absolutely guaranteed to be free from opiates or other harmful drugs. They are a mild but thorough laxative and cannot possibly do harm—they always do good. Concerning them Mrs. Jos. Ache, Cotnam Road, N.B., writes: "I think that Baby's Own Tablets are a marvellous medicine for little ones. I gave them to my little girl with such good results that I now strongly recommend them to all mothers. The Tablets are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont."

New Egyptian Flag

It is announced that the new Egyptian flag will be green with three white stars and a white crescent. The royal flag will have in addition a crown.

MOTHER SAVES DAUGHTER'S HEALTH

Lydia E. Pinkham's Vegetable Compound Helped Both Mother and Daughter

Lumsden, Saskatchewan—"My mother had taken Lydia E. Pinkham's Vegetable Compound when I needed something for my periods. I took it and got good results. I recommend it to women with many female troubles and I know other women who have been helped by it and do the same."—Mrs. Max Rutter, Lumsden, Saskatchewan.

Many cases like this come to our notice. Lydia E. Pinkham's Vegetable Compound is often recommended by the mother and the grandmother too, for in mind, it has been helping women for nearly fifty years.

Women Tell Each Other

In your own neighborhood are women who know the value of this wonderful medicine and they talk to one another about it. So if you are troubled with pains and irregularities, a tired feeling, nervous and sleepless spells, or have other annoying symptoms caused by some female trouble, you have only to ask some neighbor what she thinks of your taking Lydia E. Pinkham's Vegetable Compound.

Minard's Liniment Lumberman's Friend

A Double Escape

DOCTOR'S DAUGHTER'S STORY.

Another Toronto home provides evidence of how a simple cut, scratch or bruise may pay the way to deadly poison. When it is shown there is a vital need for keeping a reliable antiseptic like ram-buk always handy.

When called upon by S. B. Bussell, Avenue, Mrs. J. E. Zealley, daughter of the late Dr. Bessie, of St. David's, St. James, said: "My boy Alfred scratched his leg with the brass jag of a shoe lace. A nasty poisoned sore developed and it defied all the usual ointments. Hearing splendid reports about ram-buk I decided to give it a trial. To my great relief, the pain soon ceased and healing set in. All inflammation and poisonous matter was quickly removed by ram-buk. It healed the sore without leaving a scar. Again when I fell over a steel fence and injured my knee badly, ram-buk alone saved me. My doctoring, a nurse, was of the opinion that only an operation could remove the mass of inflammation and pus that gathered about the wound. Ram-buk, it cleaned and healed the wound in a few days. Equally valuable for eczema, pimples, cuts, burns, etc."

Canadian Authors' Association

Montreal Branch Now Numbers 129 Members

The annual meeting of the Montreal branch of the Canadian Authors' Association indicates progression in both membership and influence. Among those entertained by the branch during the past year were Mr. Bliss Carman, Mrs. Nellie McClung and H. M. Meredith, some of the famous novelists, of the publishing house of Archibald Constable, London, Eng. Miss J. E. Sime, whose recent novel, "Our Little Life," has been favorably reviewed, was elected chairman for the present year. The branch, which now numbers 129 members, will hold monthly informal meetings during the coming year.

A CORDIAL INVITATION TO DISEASE

This is an apt description of Constipation. It's an unnatural condition to begin with—but it's dangerous because it leads to indigestion, fills the system with poisons, brings on anemia. You don't need a purgative, you don't want to weaken the system, you want to get rid of the poisons. What you need is mild natural stimulant to the bowels. You get just what you need in Dr. Hamilton's Pills which tones up the liver, restores the bowels to perfect action and positively end constipation. You'll feel tip top again, and your system will be old—a real family medicine. 25c a box or 10c a box. The Catarrhose Co., Montreal.

Prince Sends More Stock

Horse Valued at \$55,000 Sent to Royal Ranch in Alberta

Four pure-bred race horse stallions and five mares have recently been shipped by the Prince of Wales from England to his ranch at Bedford, Alta., which he bought when he visited Canada in the summer of 1919. One of these stallions was purchased in England recently for \$5,000. Since His Royal Highness has had his Alberta ranch he has made several shipments of pure-bred stock from the Old Country. The last consignment of horses was sent over in charge of a special staff from one of his English farms.

An Oil that is Famous—Though Canada was not the birthplace of Dr. Thomas' Electric Oil, it is the home of it. From the time it was first made its good name was spread to Central and South America, the West Indies, Australia and New Zealand. That is far ahead enough to attest its excellence, for in all these countries it is on sale and in demand.

Wishes Lloyd George Success

Failure Means War for Europe Says Gen. Smuts

Lieut.-Gen. Jan C. Smuts, Premier of the Union of South Africa, in a statement to the Cape Times on the subject of the Genoa conference said he prayed for victory for Lloyd George, for it all that resulted from the conference was the Russo-German treaty and the division of Europe into two armed camps, Europe would irrevocably split and Genoa would become a new and fatal milestone in European policy.

General Smuts said that if the faith of France and Russia in Lloyd George was not strong enough to bring about a general disarmament, which Britain is adopting on land and sea, would yet prove a fatal blunder and it were far better for Britain to face realities at once and arm in her turn.

Lloyd George could succeed in modifying the militarist policy of Poincaré and Chicherin, disarmament must disappear throughout Europe. Armageddon would become the only goal of western civilization.

There are seven joints in a giraffe's neck, the same number as in the neck of a man.

Minard's Liniment used by Physicians

German Money Makers

Presses and Engravers Inadequate to Meet Demand

A terrible tragedy has transpired in the German Government's bureau of engraving and printing. Plates cannot be engraved fast enough and presses run out of fuel to turn out thousands of mark paper notes. Germany's paper note printing presses have reached their physical limit and the demand for paper money still greatly exceeds the supply.

Solving the dilemma, the German Government for the first time in the history of the mark has decided to print and issue 5,000 mark notes, which are much easier manufactured than the impressive 1,000 mark bills. The new 5,000 mark notes will appear on the market in the course of the summer. Germany's largest monetary unit, the one thousand mark note, is worth 100 times the rate of exchange \$2.50, and the smallest paper note, that of 1 mark, is worth 3 1/2 mills.

No surgical operation is necessary in removing corns if Holloway's Corn Remover be used.

Alberta as a Seed Producer

State of Perfection

Alberta, it is officially stated, has supplied the rest of Canada with a half million bushels of seed oats this spring. It is equally significant that orders came from every other province in the Dominion. As a seed-producer this province is only getting started, but it is getting started right, and is already securing results. Alberta oats stand in a class by themselves; no other part of the continent can produce either the quality, or the quantity per acre. "What is true of oats is true of other grains, and of grasses and vegetables. We may not grow here as wide a variety of crops as is possible in more southerly latitudes and lower altitudes, but what can be grown is grown to perfection. More and more the older provinces and the states will recognize that they must come to Alberta for hardy and virile seed. Much credit for what has been attained, and for the greater achievement yet to come, is due to the persistent and successful efforts which have been made by the faculty of agriculture at the University to interest Alberta farmers in seed-growing and to direct their operations in a way to build up a high reputation for their product. And the showing made last year and the year before, when Alberta exhibits carried away a good many of the coveted awards at the International fair and grain show at Chicago, has not been barren of practical results. It pays to produce the best; and then to let the world know that we have it.—Edmonton Bulletin.

Are Britons Decadent

Idea Disproved by Statistics of University Boat Crew

In the annual university boat race between Oxford and Cambridge which came off a month or so ago, the eight oarsmen in the Cambridge boat averaged six feet one and three-quarter inches in height and one hundred and seventy-eight and a half pounds in weight as they stepped into the shell—which, out of training and in street attire, would mean an average of close on 200 pounds, says the Oxford Journal. Only one man in the crew was under six feet; two of them were respectively six feet five and six feet four and a half in height. The Oxford eight averaged six feet half an inch in height and 172 pounds rowing weight. The gigantic Cambridge crew were as good as the boat as they were big; they were the very fast time—almost the fastest of the records of the university boat race, which go back now nearly a hundred years.

It was the fashion before the war to talk of the physical decadence of Englishmen, the text being afforded by the underfed and underdressed inhabitants of the slums of the great industrial centres. But the war saw six millions of vigorous men in the British army and navy, and several millions of effective men in the coal mines, engineering works, shipyards and other home work in the British Isles, and the idea that any large proportion of the adult male population of Britain was effete was dispelled. And judging by the statistics of the latest university boat race, showing two exceptionally powerful crews physically, one of them probably the finest which ever competed, the well-to-do class in England are still at the height of stamina.

Nine-tenths of the tea imported to the United Kingdom comes from India and Ceylon.

Stops Bronchitis Quickly, Helps Irritable Throat, Ends Sneezing, Coughing

Relief comes at once when you breathe in the cooling vapor of Catarrhose. Once its healing, piny essences strike the bronchial tubes, you realize that a powerful treatment is at work. Irritation can't live in the throat of a person inhaling Catarrhose. It is so soothing, so warming, so full of concentrated healing power that you get results at once. Catarrhose strengthens the weak throat, stops the cough, removes that hacking irritating necessity to clear the throat, makes even the chronic sufferer realize that at last he has discovered a real friend. For coughs, colds, catarrh and winter ills, nothing in the family could be better than the complete dollar outfit. Small size 50c, trial size 25c, all dealers or the Catarrhose Co., Montreal.

Soldier Settlement in B.C.

A total of 2,738 soldier settlers have been placed on British Columbia farms, 900 of whom have settled in the Lower Fraser Valley, according to a statement made by R. L. Ramsay, field supervisor for the Soldier Settlement Board at a meeting of agricultural officials here.

RHEUMATISM?

Health is the Most Valuable Asset You Have. You cannot Afford to Neglect It.

Crofton, B.C.—"I was troubled for years with inflammatory rheumatism and rheumatic fever. I tried several cures for rheumatism, but did not receive any benefit from any of them. I had been in the hospital for months, being unable to walk. A friend advised me to try Dr. Pierce's Auric Tablets.

After taking the first bottle I began to improve, and after taking six bottles I had no more rheumatism. I think Dr. Pierce's Auric Tablets is the most wonderful medicine that any one can take for rheumatism. I have recommended these tablets to several of my friends and they, too, have all been benefited by them."—Melville Colquhoun.

People are realizing that the kidneys, just as do the bowels, need to be flushed occasionally. The kidneys are an eliminative organ and are constantly working, separating the poisons from the blood. Uric acid backs up into the system, causing rheumatism, neuralgia, dropsy and many other serious disturbances.

This can be avoided by stimulating the kidneys to increased action, and because of its tonic effect on these organs any one would do well to get Dr. Pierce's Auric Tablets which are to be had nowhere at almost any drug store or send 10c to Dr. Pierce's Laboratory in Bridgeville, Pa., for trial package and write for free, confidential medical advice.

Three In One Oil Syndicate

Capital Stock \$125,000. 2500 Units Par Value \$50 Per Unit.

A Common Law Trust

Offices at Shelby, Toole County, Montana

For the past several weeks we have been "telling the world" that the Kevin Oil Field on the Great Sweet Grass Arch in Toole County, Montana, is on the verge of a tremendous boom---A boom that will cause a stampede into this field such as America has never before witnessed.

Our faith in this belief increases day by day as the foremost geologists of America stamp the field with their mark of approval.

We have been telling you how a proper investment in this field, if made before the big boom takes place, will net the investor a neat little fortune.

It is a well-known fact that the laboring man and the ordinary professional man, as well as the ordinary farmer, merchant or business man does not accumulate any considerable amount of wealth; and this is very often due to the fact that he lacks the courage of his conviction, thus failing to invest where a little money would return enormous profits.

The great captains of industry—the men of great wealth, the country over—are men of courage, who have taken a chance. They have taken advantage of ground-floor investments which have earned them handsome profits on their money.

There's big money in oil. There is no other field of endeavor that offers such large returns on the money invested, provided you get in on a real ground floor proposition with a clean company that is efficiently and honestly managed. During the next few months—maybe only weeks—the great fortunes from Northern Montana Oil will be made for small investors.

During these past weeks we have been pointing out to you many reasons why you should invest in the Three-in-One Oil Syndicate. You already know of our large

holdings, amounting to over 10,000 acres in all; of our active development program; and of our recent purchase of a valuable lease on an 80 acre tract near the Campbell well, which is to be developed in the near future.

You will have missed the one best bet in this field if you put off your investment too long, for if our stock continues selling as it is at present our books will be closed to further subscription within about two more weeks.

If you want to share with us in the enormous profits that are sure to come with the development of our extensive holdings, carefully fill out the subscription blank below and mail same to us at once.

A limited number of Units left at \$50.00 each, for actual development purposes.

A WORD ABOUT OUR SECRETARY

Mr. H. C. Stapleton, Secretary of the Three-in-One Oil Syndicate, was the organizer of both the Troy Sweet Grass Oil Syndicate and the Three-in-One Oil Syndicate, and it was his money that brought about drilling on the Gas Ridge Dome.

In the spring of 1921 he put up a check for \$1,000.00 with the Stockmen's National Bank of Fort Benson, Montana, guaranteeing to drill by September 1st, 1921. The drill was operating in July of that year.

AN INNOVATION FOR VACATION TRAVEL

This is the age of advancement. People insist on seeing something new and seeing it in a new way. Things are done differently than they were years ago, and with the idea of being up-to-date in every respect, the Canadian National Railways are affording the people of Western Canada an unusual opportunity of meeting these desires. This is a special train is being operated, commencing at Winnipeg through to Prince Rupert, connecting with G. T. P. steamship for Vancouver, Victoria and Seattle, making stops at various points of interest enroute, such as Little Lake Manitou, (Watrous), Saskatoon, Buffalo Park (Wainwright, Alta.), Edmonton, Jasper Park Lodge (Jasper, Alta.), Prince George, the cameras in operation on the Skeena River, B. C., Prince Rupert, Vancouver, Victoria and Seattle. This train will leave Winnipeg at 11:30 P. M., Friday, June 30.

The lowest possible fare will be charged, viz: \$130.00, which will include return transportation from Winnipeg, with corresponding reduced fares from other points; also sleeping car fare, meals and all entertainment on the going trip, so that the passengers will only be required to pay for their meals and berth on the return trip. Choice of various routes may be had for the return trip.

An official of the Canadian National Railways will accompany the party throughout on the going trip to look after their comfort and pleasure, which will ensure an enjoyable time for all concerned. The number will be restricted, so as to ensure a maximum of travel and comfort.

Full information may be had from any Canadian National Railways Agent.

SILVER LANE

Mr. and Mrs. Smith, parents of Bill and Dallas, are up from Missouri visiting the boys for a few weeks.

Mr. and Mrs. C. A. Riley spent Sunday at the Archie Tomlinson home in Glenholm vicinity.

There were ball games on Section 21 again Sunday. The feature game was a game of indoor ball between the married men and the single men, which was won by the bachelors. By next week it is expected to have equipment on the grounds for baseball, football, basketball and indoor ball.

The boys at school are having some wholesome sport out of a set of boxing gloves, supplied by Lynn and Verle Walters.

A number of neighbors dropped in on Mrs. J. W. Bronson the evening of the 30th of May to pay their respects in honor of their birthday. The evening was pleasantly spent in conversation and listening to the Bronson's Edison.

The following report of Silver Lane school was supplied by the teacher: Enrolment for May 16th. Average attendance 14.14. Neither absent nor tardy during month Nora Bronson, Lois Horn, Donald Horn.

SUNNY BRAE DOINGS

Miss Alice Higginson of Waterton, Ont., who has spent a year visiting her brothers F. W. and G. N. Higginson of this district, left last Saturday to visit friends in Winnipeg.

Most everybody has finished seeding and some have started breaking.—Miss Inez Fenton, who was delegate to the W. M. S. Conference in Edmonton, returned home last Thursday.

T. N. Sellars and the Smart Bros. are planning to ship a car of oats before long.

We are all taking a peculiar interest in George Sawyer since we noticed the nice curtains and etc.!!! which has taken place lately.

Our High School students are, as usual, all getting real interested as Exams are drawing near, and we all wish them the very best of success for their hard winters work.

The glorious rain which visited our district was very welcome and crops etc., are in the best of condition.

NOTICE.

Notice is hereby given that if all arrears of taxes in respect of any parcel of land situated within the Municipality, are not paid on or before the 1st day of July 1922, such land will be dealt with under the provisions of "The Tax Recovery Act, 1922" with a view to obtaining certificate of title in the name of the Municipality in respect of such parcel.

R. J. TATE,
Secy-Treas. M. D. No. 423

JARROW

Jarrow had a fine Sports Day the third of June. Crowds of people and a fine time generally. The baseball teams, Batts against Jarow, and Jarow against Kinsella, were both won by Jarow. Come again and see who beats.

The stand did a rushing business that day as it was such a nice warm day, and the lunches sold well.

The bucking contest resulted in one man getting thrown off his horse and the horse stepping on it, broke it. The doctor being on the grounds was called and the arm soon attended to.

Ward Matthews is plowing for oats on Mr. H. Bick's place.

R. O. Moore went to Edmonton the first of this week.

Mrs. Ruth Robinson is visiting her parents Mr. and Mrs. Whiddon.

Mr. Grum from 30-46-10 went down Monday to get work on the Government road.

M. and Ms. Jim Holloway called Sunday evening at the home of J. M. Moore.

Miss Jennie Matthews came up from Chauvin to spend the 3rd and see her parents.

THANKS

The Jarow Board of Trade wishes to thank all who attended and helped to make the Sports Day the success it was, and especially those who made donations to the booth.

The proceeds of the day are to be used for the fencing of the Jarow Memorial Park, which fencing and fixing of the grounds will soon commence.

Signed, on behalf of The Jarow Board of Trade.

J. E. Holloway, Pres.
H. H. M. McDougall, Sec.-Treas.

ATTENTION!

"ELIZA COMES TO STAY"
Will be given in Jarow, June 16th. The play given by the Valley school pupils at Jarow. Time 3 hours. Will commence at 9 o'clock. Stacks of fun. Everybody come and enjoy a good laugh.

TENDERS

Tenders will be received by the Council of the Village of Irma for two cement walks across Main St. Specifications to be had at Municipal Office.

Also for hauling sand, by the cubic yard—to be spread on Main St. from 1st Ave. North.

P. J. Hardy, Sec.-Treas.

BARN DANCE

A barn dance is being held at the barn on Mr. B. Hann's farm on Sec. 2-47-8, on the evening of Friday June 23rd.

Ladies bring refreshments. Gentlemen bring ladies. Proceeds in aid of Avon- Glen school fund.

Easy Now to Rid Your Farm of Gophers

Wonderful Discovery by Noted Scientist Kills Every Gopher Within a Week's Time—Not a Poison.

Gophers cost farmers over two hundred millions of dollars a year, thru the destruction of crops and damage to land. Farmers need no longer suffer this loss because they can now kill off all the gophers on their farm in less than a week's time. This is possible through the remarkable discovery of E. R. Alexander, a chemist who has perfected a virus which kills gophers and rats as though by magic. This product is not a poison—it can be eaten by human beings or any animal on the farm as safely as their regular food, but means quick, sure death, to gophers.

This wonderful gopher virus, which is known as Alexander Gopher Killer, is merely mixed with bread or meat scraps and placed where gophers, rats and mice can get at it. Within a few hours after a gopher has eaten Alexander Gopher-Killer he gets a high fever and suffers a terrible thirst. He leaves his pits and nesting holes and goes to the open field in search of pure air and running water.

It is a scientific fact that one gopher he affects others and soon the whole colony dies. And though this virus is absolutely deadly to gophers—chickens, hogs, cattle or any farm animal can eat it and not be affected at all.

So confident is Mr. Alexander that Alexander Gopher-Killer will kill every gopher on your farm in less than a week's time that he offers to send, as an introductory offer, a regular \$4.00 tube for only \$2.00. Give it according to directions, and if at the end of a week's time you are able to discover any gophers, rats or mice on your farm your money will be refunded. A big Toronto bank guarantees that Mr. Alexander is reliable and will do as he says.

Just send money order, check or currency for \$2.00 to E. R. Alexander, Laboratories, 5004 Terminal, Toronto, Ontario, and the tube will be mailed at once on the guarantee that if not absolutely satisfactory your money will be returned without questions. Write today and stop your gopher losses now. 9-15-c.

NOTICE.

Notice is hereby given that if all arrears of taxes in respect of any parcel of land situated within the Village of Irma are not paid on or before the 1st day of July, 1922 such land will be dealt with under the provisions of "The Tax Recovery Act, 1922" with a view to obtaining title in the name of the Village of Irma, in respect of such parcel.

P. J. Hardy,
Sec.-Treas.
